

JASMIN BED RAIL PROTECTOR

For a more reliable health care bed - reduces the risk of bumps and scrapes.

Jasmin bed rail protectors are easily placed on the bed rail and provide a safe rest for the patient. A bed rail protector provides safety for the patient by reducing the risk of pressure, crushing and chafing injuries.

The bed rail protector also provides additional comfort by providing a softer surface. For anxious patients a model with a cover that can be tucked under the mattress is recommended. The bed rail protector is available in different models depending on the bed model and the patient's needs.
