Rescue mattress

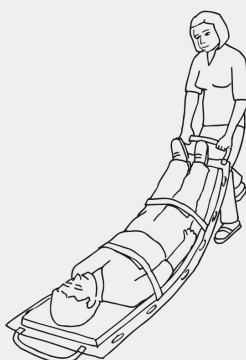

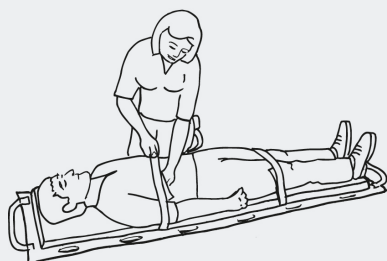

Järven Rescu mattress. Rev 24.12.00

JÄRVEN RESCUE MATTRESS

For quick and safe evacuation in case of fire or other hazard.

With the Järven rescue mattress, a person can evacuate a person in distress on their own, providing extra security for both staff and patient. The rescue mattress is particularly effective for situations where evacuation may involve the transportation of injured or disabled people.

The rescue mattress is uniformly designed with an underside that slides equally well on wet and dry surfaces. It is radiotransparent and fitted with Velcro straps for secure fixation. The underside is heat-reflective.
