

THE SCHAMPI SUPPORT PILLOW

For better sitting support at the edge of the bed

In consultation with care professionals, Järven Health Care has developed the Schampi Support Pillow, to offer a secure sitting position for anyone unable to sit up without support. The Schampi Support Pillow is simply placed behind the patient's back and creates a comfortable sitting position that helps the patient eat or read. The moulded lumbar support provides good comfort and can also relieve anxiety and shortness of breath in patients with respiratory or heart diseases.

- **PROVIDES A GREATER SENSE OF WELL-BEING AND SELF-ESTEEM** By offering more positioning choices, the care recipient gains more freedom of position that can be crucial for their well-being.
- **MAKES LIFE EASIER FOR HEALTHCARE PERSONNEL** when feeding, dressing/undressing, and other patient care tasks, more ergonomically, and frees up resources.
- **CAN PREVENT PRESSURE ULCERS** by offering the patient more positioning options.
- **CAN HELP PATIENTS WITH THEIR BREATHING** Being able to sit up instead of just lying down makes breathing easier and is recommended*, for example, with Covid patients.

** Danderyd Hospital, and others.*

THE SCHAMPI SUPPORT PILLOW

DEVELOPED TO MAKE LIFE EASIER FOR BOTH PATIENTS AND PERSONNEL

The Schampi Support Pillow offers a stable sitting position for care patients unable to sit up without support. The pillow is positioned behind the patient, that enables them to read or eat in more comfort. The moulded lumbar support provides good comfort and can also relieve anxiety and shortness of breath in patients with respiratory or heart diseases.

By increasing user positioning options, the Schampi Support Pillow can reduce the risk of pressure ulcers while offering a greater range of body positions, which can be crucial for patient well-being. The Schampi Support Pillow makes life easier for healthcare personnel as it means they have a more ergonomic posture when feeding, dressing/undressing, and performing other patient care tasks. In so doing, this also and frees up personnel resources.

The Schampi Support Pillow is suitable for a variety of healthcare environments, including hospitals, elderly care homes, palliative care units and rehabilitation units. It is also suitable for use in care for people with disabilities, maternity wards, accommodation for people with disabilities, and home help care.

The pillow has a soft and comfortable polyurethane cover that is easy to disinfect and wipe clean. The cover has a velcro fastening for easy removal if necessary.

**Invest in the Schampi Support Pillow for greater comfort and increased well-being.
A SIMPLE SOLUTION FOR A BETTER CARE ENVIRONMENT FOR BOTH PERSONNEL AND PATIENT**
